Lucknow, India

2021

## PROJECTS

### WANDERVERSE | Javascript, CSS, EJS, Node.js, Express.js, MongoDB | [Github](#) | [Project Link](#) March 2024

- Designed a web platform inspired by Airbnb for travel accommodations and experiences.
- Leveraging MVC architecture, the project is organized into controller and route folders.
- Authentication and authorization are seamlessly integrated using Passport.
- Key features include map location display utilizing MapTiler's geocoding, robust form validations with Joi schema, and image storage using Cloudinary.

### GRIEVEASE | React | [Project Link](#) | [Github](#) October 2023

- A community-driven web application developed for residents to register and resolve grievances with local government authorities, aligning with the smart city concept.
- As a key team member, contributed to the front-end development using ReactJS for an intra-college hackathon.

### TIC-TAC-TOE GAME | HTML, CSS, Javascript | [Project Link](#) | [Github](#) July 2023

- Implemented intuitive user interfaces with HTML and styled them with CSS while implementing game logic and interactivity using JavaScript.

## WORK EXPERIENCE

### TRAINING & PLACEMENT CELL, IET LUCKNOW
